

## **CarePoint Training**

After users have successfully submitted their SAAR forms to the Public Health Center, they will be notified by email that their accounts have been approved. New account holders who need access to patient level data must then attend the mandatory 90-minute training provided by the MHSPHP staff. The training schedule is posted in the Announcements section on the MHSPHP Overview page. The schedule includes the DCO website and dial-in information. Users may attend any session.
